AUTOMATIC ROTARY TURNTABLE

PUSHBUTTON CONTROLS

The Phoenix Pushbutton Control Panel provides many features most competitors offer as options

Including:

Independent Variable speed up/down carriage control.

Separate 1 to 9 top and bottom wrap selectors.

Multiple Wrap Patterns including Wrap Up/Down, Wrap up only and Top Cover Pause.

HEAVY DUTY TURNTABLE

Constant loading and unloading of heavy pallets on the turntable takes it's toll on this most critical element of the machine. Heavy-duty, robust construction and durable components are the choices we make when it comes to this part of the machine.

High capacity table support casters containing roller bearings with easy access center grease nipple.

PRESTRETCH CARRIAGE

A solid design concept both mechanically and electrically for a durable, dependable powered pre-stretch film carriage with added operator safety in mind!

The Phoenix film carriage design allows for the fastest and safest roll change in the industry.

Simply open carriage gate, lay the film on the gate, and close the gate.
IT'S THAT SIMPLE !

CUT & WIPE SYSTEM

The pneumatic controlled cut & wipe system automatically cuts the film and applies the film tail to the load. A timed impulse heat system, cold to the touch in seconds offers a safe cutting system.

Pneumatic driven clamp holds the film tail during rotation. The clamp release the film tail at the end of the cycle and once the table stops, the film clamp is activated to close and hold the film for the cutting process.

NOTHING BEATS THE BEST IN CLASS!

FLEXIBLE:

Meets most Stretch Wrapping Applications and is customized to meet your exact requirements.

FAST:

Up to 12 RPM stretch wrapping speed. Fastest in its Class.

REDUCED FILM USAGE:

Simple yet powerful controls provides flexibility and film savings. Separate 1-9 top and bottom wrap count provides up to 15% Savings.

SUPERIOR STANDARD FEATURES:

Best in Class Wrapping Flexibility with Pushbutton Control provides all features as standard.... **Including those not available (or an upcharge) on competitive models.**

GENERAL SPECIFICATIONS

Load Size	56" x 56"
Load Weight	4000 lbs.
Load Height	80"
Power Req.	120 Vac. 15 Amp

Controls

Up/Down Speeds carriage	Separate
Top & Bottom Wrap Counters	Separate 1-9 count
Motor Controls	Variable Frequency Drives

Warranty

3 years-All Parts / 10 years-Frame
Lifetime warranty on Pre-stretch Rollers

Machine

Speed (variable)	12 RPM
Load Weight	4000 Lbs.
Max Load Size	56"x56"
Production Cap.	35-50/hr.
